## EDUCATION

<b>The University of Texas at Austin, Austin, TX, USA</b> <i>Master of Science in Operation Research and Industrial Engineering</i>	Aug. 2018 – May 2020 <i>GPA: 3.59/4.00</i>
<b>Birla Institute of Technology and Science, Pilani, India</b> <i>Bachelor of Engineering in Manufacturing Engineering</i>	Aug. 2013 – May 2017 <i>GPA: 8.18/10.00</i>

## EXPERIENCE

<b>Data Scientist II</b> <i>SparkCognition</i>	June 2020 – Present <i>Austin, TX</i>
<ul style="list-style-type: none"><li>Working on building a predictive maintenance model for Pepsi to detect machine failures for Mountain Top plant</li><li>Engineered information out of 1.2GB, complex and, unstructured dataset for Saudi Aramco to build a anomaly detection model using AutoEncoder</li><li>Built a Time Series Forecasting model for Ardor Energy using Dual Attention based RNN model achieving a MAPE of 1.98% beating the previous best MAPE of 2.1% saving \$1.4M for the company</li><li>Working on the development of SparkPredict which is the AI-based predictive maintenance product of the company</li></ul>	
<b>Artificial Intelligence Research Assistant</b> <i>The University of Texas at Austin</i>	May 2019 – May 2020 <i>Austin, TX</i>
<ul style="list-style-type: none"><li>Worked under the supervision of Dr. Peter Stone on developing an environment for implementing multi-agent deep reinforcement learning policies on RoboCup Rescue Simulator</li><li>Trained algorithms like Proximal Policy Optimization (PPO) and Deep Q-networks (DQN) using OpenAI's Gym on different sized maps to find out which one works better in that particular setting</li><li>Final model accomplished tasks in 18% lesser time as compared to the previous best model</li></ul>	
<b>Graduate Engineer Trainee</b> <i>Weir Minerals</i>	Jan 2017 – June 2018 <i>Bangalore, India</i>
<ul style="list-style-type: none"><li>Developed and validated component scenario to reduce part tooling estimate by 20% resulting in annual savings of \$4.2M</li><li>Wrote SQL queries to extract models and identify cost drivers in machine component design</li><li>Developed weekly report for the executives which helped discover actionable insights and KPI's in Tableau</li></ul>	

## ACHIEVEMENTS

- Winner of UT Austin's Data Hack 2019 organized by Microsoft Azure, Oracle and ML DS group at UT Austin
- Published Machine Learning articles on Medium.com which garnered more than 50k+ views

## PROJECTS

<b>Anomaly Detection using Semi-supervised Hybrid Model Approach</b>   <i>Python</i>	Jan 2019 – May 2019
<ul style="list-style-type: none"><li>Built a semi supervised hybrid model in Tensorflow using Auto Encoder and KNN for early breast cancer detection</li><li>Compared and evaluated results with One-Class SVM in terms of their F1 scores</li><li>Final model improved detection accuracy and reduced computational complexity</li></ul>	
<b>Predicting Click Through Rate for an Ad Agency</b>   <i>Python</i>	Aug 2018 – Dec 2018
<ul style="list-style-type: none"><li>Developed machine learning model to accurately predict the number of customers visiting an Ad Agency</li><li>Analyzed and processed data using various data visualization tools like Seaborn, feature engineering tools and performed hyperparameter tuning using Bayesian Optimizer</li><li>Ranked 6th among a class of 400 students in the In-class Kaggle Competition achieving an AUC score of 0.944</li></ul>	

## TECHNICAL SKILLS

<b>Languages</b>	Python, R, Java, MySQL, MATLAB, HTML
<b>Packages</b>	Numpy, Pandas, Matplotlib, Keras, TensorFlow, Fastai, Plotly, Scikit-learn, SciPy, Seaborn
<b>Technologies</b>	Spark, Hadoop, Linux, Version control, Shell Scripting
<b>Statistical Skills</b>	Regression, Classification, Clustering, Dimensionality Reduction, Hypothesis Testing
<b>Courses</b>	Data Science lab, Time Series Analysis, Linear Statistical Models, Applied Probability
