

# Animesh Goyal

512-825-5185 | animesh.goyal9@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

## EDUCATION

**The University of Texas at Austin, Austin, TX, USA** Aug. 2018 – May 2020  
*Master of Science in Operation Research and Industrial Engineering* GPA: 3.70/4.00

**Birla Institute of Technology and Science, Pilani, India** Aug. 2013 – May 2017  
*Bachelor of Engineering in Manufacturing Engineering* GPA: 3.86/4.00

## EXPERIENCE

**Data Scientist II** June 2020 – Present  
*SparkCognition* Austin, TX

- TODO
- TODO
- TODO

**Artificial Intelligence Research Assistant** May 2019 – May 2020  
*The University of Texas at Austin* Austin, TX

- Working under the supervision of Dr. Peter Stone on developing an environment for implementing and testing various multi-agent deep reinforcement learning policies to study their effect on achieving pre-defined objectives
- Project involves integration of functionalities to several thousand lines of code in RoboCup Rescue simulator
- Training algorithms like Proximal Policy Optimization (PPO) and Deep Q-networks (DQN) using OpenAI's Gym on different sized maps to find out which one works better in that particular setting

**Graduate Engineer Trainee** Jan 2017 – June 2018  
*Weir Minerals* Bangalore, India

- Developed and validated component scenario to reduce part tooling estimate by 20% resulting in annual savings of \$4.2M
- Wrote SQL queries to extract models and identify cost drivers in machine component design
- Developed weekly report for the executives which helped discover actionable insights and KPI's in Tableau

## ACHIEVEMENTS

- Winner of UT Austin's Data Hack 2019 organized by Microsoft Azure, Oracle and ML DS group at UT Austin
- Published Machine Learning articles on Medium.com which garnered more than 25k+ views

## PROJECTS

**Movie Recommendation System | Python** Aug 2019 – Dec 2019

- Built a model to recommend movies to a new user using Multi-Armed Bandit algorithms like Epsilon Greedy, UCB
- Implemented Collaborative Filtering to fill sparse user rating matrix and clustered them using K-means clustering
- Thompson Sampling performed best with normalized discounted cumulative gain (NDCG) score of 0.94

**Anomaly Detection using Semi-supervised Hybrid Model Approach | Python** Jan 2019 – May 2019

- Built a semi supervised hybrid model in Tensorflow using Auto Encoder and KNN for early breast cancer detection
- Compared and evaluated results with One-Class SVM in terms of their F1 scores
- Final model improved detection accuracy and reduced computational complexity

**Predicting Click Through Rate for an Ad Agency | Python** Aug 2018 – Dec 2018

- Developed machine learning model to accurately predict the number of customers visiting an Ad Agency
- Analyzed and processed data using various data visualization tools like Seaborn, feature engineering tools and performed hyperparameter tuning using Bayesian Optimizer
- Ranked 6th among a class of 400 students in the In-class Kaggle Competition achieving an AUC score of 0.944

## TECHNICAL SKILLS

<b>Languages</b>	Python, R, Java, MySQL, MATLAB, HTML
<b>Packages</b>	Numpy, Pandas, Matplotlib, Keras, TensorFlow, Fastai, Plotly, Scikit-learn, SciPy, Seaborn
<b>Technologies</b>	Spark, Hadoop, Linux, Version control, Shell Scripting
<b>Statistical Skills</b>	Regression, Classification, Clustering, Dimensionality Reduction, Hypothesis Testing
<b>Courses</b>	Data Science lab, Time Series Analysis, Linear Statistical Models, Applied Probability
